TITLE: Automation of titration

SOURCE: Meres es automatika, v. 13, no. 8, 1965, 248-249

TOPIC TAGS: titrimetry, automation

ABSTRACT: The new line of automatic titration instruments made by the Bran & Lubbe instrument works in Hamburg, Germany, was described briefly on the basis of the information provided by Kahmann, [initial(s) not given], Engineer, of that company. The items described were the Titrometer (modular titration unit), the Chronodos (sample metering device), and the Titrodos (titrating solution dispensing unit). All three instruments were illustrated by photographs. Orig. art. has: 3 figures. [JPRS]

TITLE: New developments in the field of electron capture [This paper was presented at Eotvos Lorand Physics Society on 4 October 1965.]

SOURCE: Fizikai szemle, no. 1, 1966, 21-24

TOPIC TAGS: electron capture, positron

ABSTRACT: Some new developments in the field of electron capture were discussed on the basis of references in the literature. The following subjects were discussed: trajectory-electron capture from various nucleus shells; internal moderating radiation; differences between electron capture and positron emission; and configuration of the internal moderating radiation accompanying the electron-capture decomposition of Cl-36. Orig. art. has: 3 figures. [JPRS: 34,780]

TITLE: Dynamic nuclear structure effects in internal conversion

SOURCE: Magyar fizikai folyoirat, v. 13, no. 3, 1965, 251-272

TOPIC TAGS: nuclear structure, nuclear physics

ABSTRACT: A review was made of the references in the literature dealing with dynamic nuclear structure effects in internal conversion. The following subjects were discussed: principles; magnetic multipole transitions; electrical multipole transitions; electrical monopole transitions; angle correlations in internal conversion; E2 transitions, results of research dealing with dynamic nuclear structure occurring in internal conversion; E0 transitions; and recent research activities. Orig. art. has: 2 figures, 2 formulas and 4 tables. [JPRS: 35,386]
